

OVERVIEW

Phase III Expansion Project

- Develop 2 new caverns (CW 6 and CW 7)
- Construct extension of existing natural gas, raw water, and brine pipeline systems to link CW6 and CW7 to existing pipeline systems
- Construct, operate and maintain approx. 2.5 miles of leaching pipeline
- Increase maximum daily receipt and delivery capacities at 2 interstate pipeline connections
- Install 2 incremental electric motor drive compressor units (Units 15 & 16)

Electric Compressor Project

- Install 2 incremental electric motor drive compressor units (Units 13 & 14)
- Construct and extension of the existing electric compressor building and motor control center
- Install new electric transformer, new coolers, additional blow down silencers and extend piping manifold
- Install misc. piping, instrumentation and electrical equipment

PLANS AND PROCEDURES

- The plans and procedures set forth herein apply to both the Phase III and Electric Compressor Projects
- Work will begin after the initial Environmental Training has been performed
